The invention relates to isolated polynuclectide (I) and objepetide (II) sequences. (I) is useful as hybridistation probes, polymerae chain resction (PCR) primers, oligomers, and for chromosome opinuclectides are chain resculping treochabinate production of (II). The polynuclectides are also used in diagnostics as expressed expense to rescore normal activity of (II) or to treat disease states involving to rescore normal activity of (II) or to treat disease states involving to uncitating a polypeptide in tissue, as molecular weight makers and as quantitating a polypeptide in tissue, as molecular weight makers and as tood supplement. (II) and its binding partners are useful for treating the polypeptide and of the interpretation critical activity. The polypeptide and polynuclectide sequences have applications in the polypeptide and polynuclectide sequences have applications in cresponsible for genetic disorders of other traits to assess biodiversity and to produce other types of data and products dependent on DNA and activity and to produce other types of data and products dependent on DNA and activity and to activity and the polyperical activity is and to produce other types of data and products dependent on DNA and the polyperic and and products dependent on DNA and the data page and to activity and sequences. Applicances of the invention over the data and product dependent on DNA and the data and product dependent on DNA and the data and product activity and the data and activity and data and product activity and and activity and data and product activity and and activity and data and activity and and a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Note: The sequence data for this patent did not appear in the printed specification, but was obtained in electronic format directly from WIPO
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New isolated polynucleotide and encoded polypeptides, useful in diagnostics, forensics, gene mapping, identification of mutations responsible for genetic disorders or other traits and to assess biodiversity
Human; chromosome mapping; gene mapping; gene therapy, forensic;
food supplement; medical imaging; diagnostic; genetic disorder.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  11.4%; Score 455; DB 22; Length 201; 42.5%; Pred. No. 1.10-31; tive 26; Mismatches 42; Indels 7.

### SUMMARIES

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Carbase (EC 1.11.1.6) HPI - Mycobacterium tuberculosis (strain H37Ry)

N.Alternate names : oxtalsase-peroxidase, hydroperoxidase 1; katG catalase-peroxidase bift

N.Alternate names: oxtalsase-peroxidase, hydroperoxidase 1; katG catalase-peroxidase bift

N.Alternate names: oxtalsase-peroxidase, hydroperoxidase 1; katG catalase-peroxidase (EC 111.1.7)

C.Species: Mycobacterium tuberculosis

C. Adversasion: ANO219, ANO622, 229071, 534036

N.Cole, S. T., Brosch, R.; Parkhill, J.; Garnier, T.; Churcher, C.; Harris, D.; Gordon, S.; Conton, R.; Davilo, R.; Parkhill, J.; Gentles, S.; Hamila, N.; Holroyd, S.; Majandream, M.A.; Rogers, J.; Rutter, S.; Seeger, K.; Skilton, S.; Squares, S.;

N.Authors: Squares, R.; Sulston, J.E.; Taylor, K.; Whitehead, S.; Barrell, B.;

N.Attubacs: catalase the biology of Mycobacterium tuberculosis from the complete genome A; Reference number: pold sequence not shown; translation not shown

N.Status: nucleic acid sequence not shown; translation not shown

N.Residuse: 1-440 COD.

N.Sesiduse: 1-440 COD.

1cs:

ex: homotetramer; two non-covalently associated iron protoheme IX groups per t lption: as catalase, catalyzes the dismutation of two molecules of hydrogen peron:  $\langle PER \rangle$ codon: GTG lon: <CAT>

ion: <PPEN>
iption: as peroxidase, uses hydrogen peroxide to oxidize donor compounds produ active with a broad spectrum of donor compounds, including larger ones which family: catalase HPI

ords: chromoprofelin, heme; homotetramer; iron; metalloprotein; oxidoreductase ective site; als (distal axial ligand) setatus predicted into the satial iron (His) (proximal axial ligand) setatus predicted ctive site; Trp (tryptophyl radical intermediate) \*status predicted
